Home Learning

(may also be referred to as Remote Learning)

For more information please refer to the information on 'Home Learning' as documented in the CPARR policies for each age – phase.

1

Learning Map

At the beginning of every term Learning Map's will be sent home to for every pupil. This will include targets across the curriculum that we would really encourage parents & carers to develop within the home setting.

2

Resources

School will send home any resources that are needed to support home learning. These may be visuals to support pupil's to understand what to do or strategies to help develop your child's communication and language skills.

3

Parental Portal

Parents & Carers will also have access to the Parent Portal through the school website and will given instructions on how to access this. Your child's class team will direct you to the videos and webinars that will be useful.

4

Feedback

It is really important that we know how pupils are progressing with 'Home Learning'. Class teams will regularly ask for an update from parents and carers and targets and resources can be adapted and enhanced as needed.
